Work Experience

- **Software Engineer, FoundersHub AI** June 2025 – November 2025
 - Led frontend development for an AI-powered startup platform using Next.js, React, TypeScript, Bootstrap, and Tailwind CSS, saving founders 15+ hours weekly.
 - Implemented agentic AI workflows with Cursor AI and Claude Code subagents, streamlining design iterations, dev cycles, and code reviews.
- **Software Engineer, PeopleBlox** June 2022 – May 2024
 - Led a team of 5 frontend developers to design and deliver PeopleBlox, a competency assessment tool, reducing employee evaluation time significantly. Used RTK Query to reduce server API calls for cached data by 30%.
 - Collaborated with management to enhance workflow efficiency by 25%, and architected software solutions and tech stack for the product.
 - Led a few team sprints and also mentored interns working on the product.
- **Software Engineer Intern (Full-Time), LitmusBlox** Aug 2021 – May 2022
 - Developed frontend for an employee assessment Chatbot Application with React.js, Redux, Bootstrap, and vanilla JS, reducing load time by 15%.
 - Enhanced the company's recruitment platform by building an automated candidate screening process in React, improving accuracy. Wrote E2E tests in Cypress which significantly reduced manual testing in candidate job creation and hiring flow.

Education

- **State University of New York at Buffalo** 2024 - Dec 2025
Master of Science in Computer Science
- Courses: Data Structures, Algorithms, Data Models and Query Languages, Database Systems, Machine Learning, Computer Security, Data Science, Operating Systems, Networking, Architecture, Entrepreneurship
- **Vishwakarma Institute of Technology** 2018 – 2022
Bachelor of Technology in Information Technology, CGPA: 3.6

Skills

Programming Languages: JavaScript (ES6+), TypeScript, Python

Frontend: ReactJS, Next.js, Redux, React Query, Material UI, Bootstrap, Tailwind CSS, CSS3, SCSS, Playwright, Jest

Backend: SQL, PostgreSQL, MySQL, MongoDB, Node.js, Express.js, FastAPI, Flask

DevOps/Cloud: GitHub Actions, Vercel, Netlify, Digital Ocean

Other Skills: Git, GitLab, Docker, React Native, NPM, Shell Scripting, Linux, Webpack, SQLAlchemy, HTML5, SEO, Accessibility, Agile, CI/CD

Projects & Publications

- **Investors Engine** May 2024 – Ongoing
 - Built an investment research platform displaying financial data for 10,000+ US stocks, historical ratios, and advanced charting tools.
 - Designed frontend with Next.js, TypeScript, React Query, Redux, and MUI for a responsive UI with stock data visualization.
- **Distributed Chat Application — C++, TCP Sockets, Linux** Jan 2025 – Mar 2025
 - Built a client-server chat system supporting multiple concurrent clients with unicast and broadcast messaging, using TCP sockets and the select() system call for efficient connection management.
 - Implemented session handling, user lists, message buffering, and debugging with gdb/Wireshark to ensure reliable real-time communication and optimized throughput.
